Special Note A:

Motorsport UK has adjusted the Yearbook regulations for 2024 and where they are installed the Light Signals must be the priority signal used at all marshals' posts rather than flags. It is therefore imperative that the circuit light panels are operated quickly to signal to competitors as this will also trigger the in-car display to each driver. Motorsport UK has produced a video to explain this method of signalling and explaining why this change is necessary. There will be set of flags available on each post and these can be used in the case of a system failure or to supplement the light signals or to display additional signals should the panel be displaying a higher grade signal. Signals for the Safety Car and for Stopping a session will be initiated and controlled by Race Control.

Special Note B:

Scrutineering will be in accordance with Q.11.2 of the Motorsport UK Yearbook which means that a minimum of 25% of the competitors in each championship will be selected for full physical scrutineering and all competitors will also complete a self-declaration form.
