

RACE INFORMATION BULLETIN

BULLETIN No: 02

ISSUED: 09:05

ALCOHOL BREATHALYSER TEST

Competitors may be selected for a random alcohol breathalyser test before qualifying and/or any race. The testing will be carried out with an AlcoSense Ultra.

To avoid the possibility of a 'false-positive' reading the Zero Alcohol Level is defined as a reading of less than 0.01%BAC. Thus, a pass will be defined as a reading of less than 0.01%BAC and a failure is defined as a reading greater than or equal to 0.01%BAC.

Any competitor selected for testing must provide proof/satisfy the medical professional supervising the test of any medical condition and/or medications that could compromise the test or result in a false-positive reading.

The results of all breathalyser tests remain confidential between the Medical Team, the Clerk of the Course and the competitor concerned.

Refusal or withdrawal of consent to take a breathalyser test will be treated as a failure of the test and the competitor may be excluded from participation at the meeting.

Any competitor failing may request a re-test 30 minutes after the failure, or sooner if the next on-track session is within 60 minutes.
